D. $\hat{\beta}_1$ _____ $\hat{\beta}_2$ _____

Each regression line has a slope and a y-intercept.

Intercept is the value of y when $x=0$.

1. $\hat{\beta}_1 = 0.11, \hat{\beta}_2 = 0.12$

2. $\hat{\beta}_1 = 0.11, \hat{\beta}_2 = 0.12$ $\hat{\beta}_1 = 0.11, \hat{\beta}_2 = 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

3. $\hat{\beta}_1 = 0.11, \hat{\beta}_2 = 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$

4. $\hat{\beta}_1 = 0.11, \hat{\beta}_2 = 0.12$

$y = 0.11x + 0.12$ $y = 0.11x + 0.12$
